

MVP features:

- Ability to sign up/login
- Ability to order and pay for food
- Ability for restaurants to add and remove items from their menu
- Ability for customers to modify their orders
- Ability for customers to search for restaurants
- Ability to filter restaurants by type (e.g. Fast food, Healthy, Thai, Gluten-free options)
- Ability to mark order as pickup

User Stories:

- As a user I want to order food in order to receive food
- As a customer with allergies I want to modify my order to have no mustard so that I can enjoy my food without fear
- As a customer with limited time for lunch I want to specify when my order is delivered so that I don't waste any time during my break
- As a restaurant on a lower budget I would like extra compensation for delivering so that I don't go under financially
- As a new restaurant with a rapidly changing menu I would like to be able to edit our available items so that remote customers can order our newer food items
- As a sandwich restaurant with a shortage of turkey I want to mark any of our sandwiches containing turkey as unavailable so that customers are not disappointed when their orders cannot be filled
